

May 4, 1928.

Hon. George Christensen,
Price, Utah.

My Dear Judge Christensen:

RE: MUDDY DIST.

I have your letter of May 3 and hasten to say that I am willing to make the appointment of Muddy Creek if such an arrangement is satisfactory to you. It has been my experience that some of the courts are a bit jealous of their powers and for this reason I have adopted the policy of going slow in situations of this kind.

I have been in touch with the interests that were objecting to Mr. Case and have already pointed out to them that the expense of sending in someone from the outside will be very considerable and it is quite possible that they will agree to the appointment of Mr. Case. I have no reason to suppose that if appointed Mr. Case will not follow out my instructions especially in view of the statement in your letter that you agree with my position concerning the limit of use to such water as can be properly put to a beneficial use.

Thanking you for the interest you take in this matter and with best wishes, I remain,

Yours very truly,

State Engineer.
